Subtracting Fractions Quiz 2

REVIEW AT HOME

- IXL: R
- Complete the Packet Pages from class (if they are incomplete)
- Complete games or review from Mrs. Rusch's Website
- Study Guide

UPDATE

Good Evening!

I felt as though it was important to touch base with all of my math families, so my way of communicating (other than on as an as needed basis) is to send out this newsletter every two weeks.

Based on the first quiz, this week we spent our time reviewing equivalent fractions and adding and subtracting fractions. By the end of the week, most students greatly improved in their skills. I highly encourage spending some time this weekend reviewing math concepts for the Math MAP on Tuesday! Also, Word Problem Homework will now be given out with a due date of one week later.

That way students will learn time management skills and have more time to give to their word problems.
